

## Guiden Importér (Import Wizard)

Du har mulighed for at uploade en fil med listeindhold i administrationsportalen. Hvis du gør det, erstatter indholdet i filen det nuværende indhold på listen. Hvis du vil gøre dette, skal du klikke på guiden Importér (Import Wizard), vælge filen på din computers harddisk og klikke på Start import (Start importing).

The screenshot shows the 'Edit list: Email Subject' page in an administration portal. The page has a breadcrumb trail: Home » Services » Lists » Email Subject. The main content area contains form fields for 'Name\*' (Email Subject), 'Description' (Email Subject to queue), 'List type' (General), and 'Key type' (Characters). On the right side, there are buttons for 'Import Wizard', 'Export list', and 'Test look-up in list'. A red arrow points from the 'Import Wizard' button to a modal dialog box titled 'File Import Wizard'. The dialog box shows a file selection step with 'list\_over\_5000.csv' selected. Below this, there are settings for 'Delimiter' (auto), 'Preview rows' (10), and 'Encoding' (auto). A 'Start Importing' button is visible in the dialog. The background shows a list view with columns for 'Key' and 'Delete', containing 10 rows of test data.
