

Eksportér liste (Export list)

Hvis du vil eksportere listeindholdet som en csv-fil, skal du klikke på Eksportér liste (Export list) og derefter på Download liste (Download list).

The screenshot shows the 'Edit list: Email Subject' interface. The main form contains fields for Name (Email Subject), Description (Email Subject to queue), List type (General), and Key type (Characters). On the right side, there are three buttons: 'Import Wizard', 'Export list', and 'Test look-up in list'. A red arrow points from the 'Export list' button to a modal dialog titled 'Export list'. The modal dialog has a 'Delimiter' dropdown menu set to '; (semicolon)' and a 'Download list' button. At the bottom left of the main interface, there is a 'Save Changes' button and a list of actions: 'List View/Edit', 'FTP File Import', and 'Import History'.
