

Reports

The new **Reports** page (Beta from October 2023) that replaced the old Reports page on January 23rd 2024, contains the 'old' page's functionality and more.

The most important new features on the new Reports page are:

- New **Chart option** (as on the Dashboard page)
- Click on column headers to **sort** the table content
- Easy to **add a custom report (table or chart) to a Dashboard widget** (e.g. yesterday's traffic)
- Improved xlsx download and new csv download

The screenshot displays the Reports page interface. It is divided into three main sections: Basic Information, Report Settings, and Report.

Basic Information: Contains a form for 'Report Name' (set to 'Details per queue') and 'Description' (set to 'Lots of parameters per phone queue, e.g. Incoming calls, Total calls, Hung up, Answered, Callback-requests, Timeouts, Answer-rate, A...'). A 'Show Details' button is visible.

Report Settings: Includes a 'Select Time Period' dropdown (set to 'Last month (February)'), a 'Limit Time Range' toggle (disabled), and buttons for 'Time Range', 'Show Settings', and 'View Report'.

Report: Features a table titled 'Details per queue' with columns for various metrics. The table includes a 'Total' row at the bottom. Buttons for 'Add to Dashboard' and 'Download Report' are located above the table.
