

Overview

Sign in to Puzzel Administration Portal here <http://admin.puzzel.com>

Puzzel Administration Portal has various main menu items each containing sub-menus that give you access to different functionality. This is how it looks when you are on page Real-time - Queue overview (Real-time is in ruby) and you have clicked on Users, so that you see the sub menu items you can select among:

When you click on a main menu item, the sub menu items are shown so that you can select the one you were looking for.

If you think the left margin menu (with icons and main menu names) takes up too much space, you can click the left arrow on top to collapse it so that only the icons are shown.

In the **lower left corner**, there are some quick links:

- **Edit user**, takes you to the edit user page where you can change password, language etc
- **Full screen**, to hide the left margin navigation menu
- **Help**, to go to help.puzzel.com
- **Status**, to open the Status page
- **Sign out**

Not all customers/users have access to all functionality, so you may not have access to all main menu and sub menu items. If you are interested in functionality that you do not have access to, please contact Puzzel Support.

Main menu	Short description
Home Page	Information published by Puzzel, traffic so far today, and KPI-values
Dashboard	Here you can see and edit Dashboards and the widgets they consist of.

Main menu	Short description

Users	Manage user groups and users, defines profiles, create Pause reasons and Enquiry registration categories, create Resource filters and configure Products
Services	Manage opening hours, sound files, lists, service variables, KPI alarms, queue parameters, Dialler campaigns, Call Flows, Social media channels, Chat and Agent Assist, and do Silent monitoring.
Statistics	See standard statistics reports, customise reports, and configure what reports to be sent to which recipients at what time intervals
Catalog	See catalog content and configure fields, departments, and mappings
Archive	Search for and analyse calls, recordings, and chat logs
Widget	For configuring tabs and widgets in the Agent Application
SMS	For configuring SMS services like Survey

Online help is available behind the question marks on all pages.

Many pages have a **filter** field in the upper right corner, below the menus. If you write something in the filter field, only rows that contain the written text will be shown. If you uncheck a column when filtering, only rows with the written text in a checked column will be shown.

Example: Show rows (users) that contain **tho** in any field except e-mail address:

The screenshot shows a user management interface. At the top, there are several filter fields: Skill, Level (with a dropdown), Profile, User group (set to 'All'), and a Filter field containing 'tho'. Below these are 'First Name' and 'Last Name' buttons. A table below shows two users: Christian Thorsrud and Thomas Hattøphere. The table has columns for Name, email, phone, Numeric ID, User Group, and Username. A red arrow points to the 'Filter' field, and another red arrow points to the 'User Group' column header, which has a checkbox that is currently checked.

Please note that a search for e.g. *pa ko* returns rows containing *pa* or *ko*, while a search for "*pa ko*" returns rows containing the whole string within the quotation marks.

On many pages you can sort the content in tables by clicking on a column heading.

A banner for Refresher training. On the left, the text reads 'Click here for more details on Refresher training' with a pink button labeled 'Learn more'. On the right, there is a colorful illustration of a town with houses, trees, and a wind turbine.
