

Enquiry registrations in Archive

In the Agent Application, agents can register what the call/chat/email was about using Enquiry registration. When an agent answers a call/accepts a written request, a new Enquiry registration tab appears (if configured). Since calls can be transferred to other agents and Enquiry registration is optional, there might be 0, 1 or more Enquiry registrations per incoming call, each containing 1 or more Topics in 1 or more Categories and/or a comment. You can search for calls/chats/emails with a Category/topic or with a specified Comment.

Start	Access Point	Recording Time	Speak Time	Caller's Number	Time before answer	Agent(s)	<input type="checkbox"/> Select
▼ 03.01.2018 08:24	21496002 (Demo...	0:11	0:11	<div>000</div>			

Note

Only Enquiry registrations linked to a request are shown in the Archive.

If you use the Puzzel Dialler and an agent **reschedules** a Dialler call, the reschedule time and "to myself"/"to any agent" will be shown below the comment. If the Dialler agent selects "Mark as unanswered", this will also be shown here.
