

## Creating and configuring Office 365 application in Azure

In this section you can create an application for Office 365 connector and configure it.

### Application registration

Follow the procedure below to register the Office 365 connector application in Azure AD:

1. Go to <https://portal.azure.com/>, and open **Azure Active Directory** and select **App registrations** and click on **New registration button**

Display name	Application (client) ID	Created on	Certificates & secrets
Microsoft Teams	[Redacted]	5/11/2020	-
Catalog Sync	[Redacted]	2/28/2018	Expired
MSAL Testapp	[Redacted]	7/10/2018	-
0365_Email_Connector	[Redacted]	5/8/2020	Current
Dummy	[Redacted]	10/9/2019	-
Puzzel Agent Application Dev	[Redacted]	4/23/2020	Current
Puzzel Catalog Sync	[Redacted]	5/24/2018	-
AzureNewInterface-Test	[Redacted]	10/22/2019	Current
Puzzel S4B Connector	[Redacted]	2/27/2020	-
My Node.js App	[Redacted]	7/6/2018	Current

2. Enter the following three parameters in the Register an application window and click **Register**

- **Name** - Choose a name for the application (e.g. Puzzel Office 365 Connector)
- **Supported account types** – Choose the option that is most relevant to you. The recommended option is “Accounts in this organizational directory only “
- **Redirect URI** (optional) – This is optional and can be left blank

Home > Development Puzzle | App registrations >

## Register an application

\* Name  
The user-facing display name for this application (this can be changed later).

Puzzel Office 365 Connector ✓

Supported account types

Who can use this application or access this API?

- Accounts in this organizational directory only (Development Puzzle only - Single tenant)
- Accounts in any organizational directory (Any Azure AD directory - Multitenant)
- Accounts in any organizational directory (Any Azure AD directory - Multitenant) and personal Microsoft accounts (e.g. Skype, Xbox)

[Help me choose...](#)

Redirect URI (optional)  
We'll return the authentication response to this URI after successfully authenticating the user. Providing this now is optional and it can be changed later, but a value is required for most authentication scenarios.

Web e.g. https://myapp.com/auth

By proceeding, you agree to the [Microsoft Platform Policies](#)

Register

3. You will see the screen below after the application has been registered. Make a note of the Client ID and Tenant ID which will be used later.

### Set up permissions

To set up the permissions for syncing the emails, do the following:

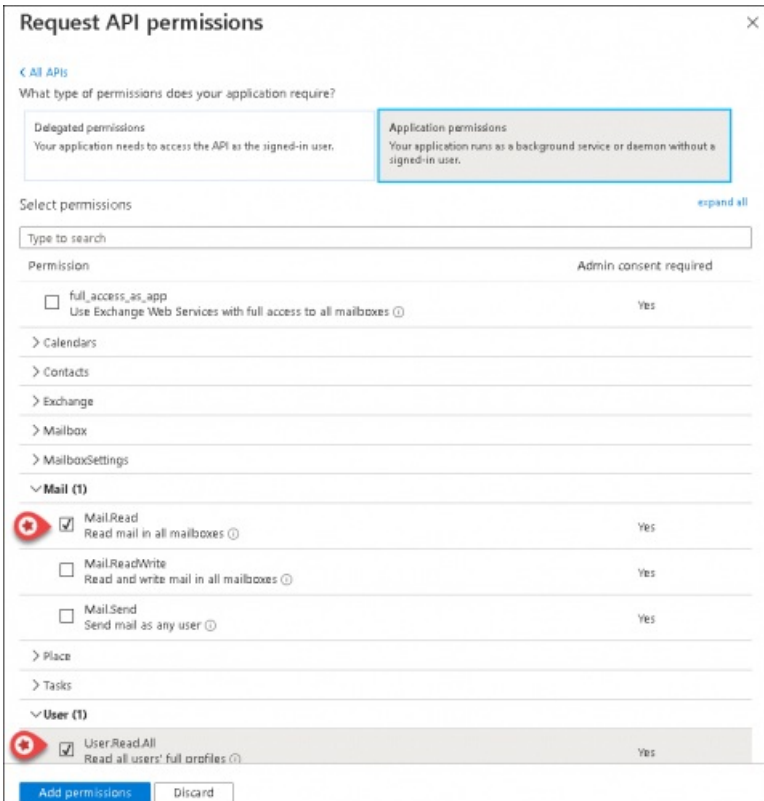

1. Go to <https://portal.azure.com/>, and open Azure Active Directory -> App registrations and select the application you just created.
2. Select **API permissions** and click on **Add a permission** button.

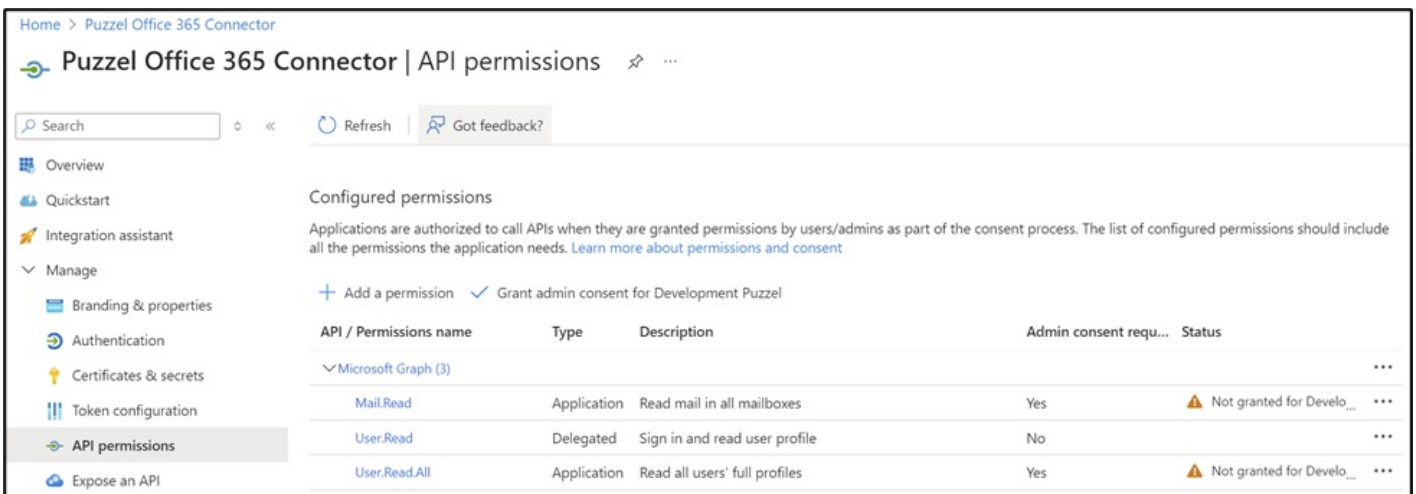

3. Select **Microsoft Graph**.

4. Select **Mail.Read** Option under **Mail** and **User.Read.All** option under **User** and **Click on Add permissions**.

5. The following screen will appear prompting you to **Grant consent** as an **Admin**. You will be asked to confirm if you wish to grant permission. Click **yes**.

6. The application will now have the required permissions.

Home > Puzzel Office 365 Connector

## Puzzel Office 365 Connector | API permissions

Search Refresh Got feedback?

Successfully granted admin consent for the requested permissions.

### Configured permissions

Applications are authorized to call APIs when they are granted permissions by users/admins as part of the consent process. The list of configured permissions should include all the permissions the application needs. [Learn more about permissions and consent](#)

+ Add a permission ✓ Grant admin consent for Development Puzzel

API / Permissions name	Type	Description	Admin consent requ...	Status
Microsoft Graph (3)				
Mail.Read	Application	Read mail in all mailboxes	Yes	✓ Granted for Developme...
User.Read	Delegated	Sign in and read user profile	No	✓ Granted for Developme...
User.Read.All	Application	Read all users' full profiles	Yes	✓ Granted for Developme...
