

SMS Campaigns

Send bulk or mass outbound SMS messages to a list of recipients list. To create, view, or edit an SMS Campaign, select the **SMS** option under the Campaigns tab on the main menu bar.

Note

You will only see the Campaigns tab if your User has access permissions under your System Role.

The main SMS Campaigns page will show the list of existing and available SMS campaigns. These are separated by your Campaigns and Campaigns created by other Users.

My Campaigns	Recipients List	Rate	Sent	Delivered	Sending Error	Delivery Error	Delivery Status	Actions
New SMS campaign	trial list (3)		N/A	N/A	N/A	N/A	Saved	[New] [Edit] [Delete]
Existing Campaigns	Recipients List	Rate	Sent	Delivered	Sending Error	Delivery Error	Delivery Status	Actions
2020-04-30 Harald Test 1	Harald Test (1)		N/A	N/A	N/A	N/A	Completed	[View] [Refresh] [Delete]
2020-05-05 Harald Test 1	Harald File Import test 1 (1)		N/A	100.0%	N/A	N/A	Completed	[View] [Refresh] [Delete]

Test Campaign SMS	Test Import (1)		50.0%	50.0%	N/A	N/A	Completed	[View] [Refresh] [Delete]

To create a new SMS campaign click on the icon or on icon to edit the saved campaigns.

Note

Note that you cannot edit the launched campaigns. However, you are allowed to duplicate it if required and relaunch it with same or different criteria.

- Enter the name of the campaign and select the SMS Channel you wish to send the messages from.
- Select Recipients list from the drop down, this Campaign should be sent to. Read [Recipients list](#) for more information how to add recipients to the list.
- Enter the subject line for the campaign. Placeholders can be used with the Subject line to include Customer-specific information such as their Name.
- Set the delivery options to either manual delivery or to be sent at a set date and time.
- Set the rate at which the campaign messages should be delivered. By default, this is set to 1,800 per minute. You may want to reduce this to have a better control over the rate of responses you receive.
- Compose the SMS campaign message in the text editor. Placeholders can be used to automatically populate any Contact specific details such as their name.
- Save and Preview the campaign to see how it looks for each recipient by pressing the **Preview** tab at the top. Any Placeholders will load for the select Recipient from the drop-down.
- Launch the campaign by clicking on the  icon against the campaign in the list.

After the Campaign has been launched, a delivery report is made available which shows whether the message was Delivered or Failed for each recipient. To see the delivery status click on the  icon against the completed campaign.
