

## Access Control - Assign Resource Filter

In addition to defining a resource filter (on page *Users - Resource filters*) you need to assign the resource filter to one or more user groups (or to single users).

If you assign a resource filter to a user group, all users in this user group inherit the filter. Users without filters assigned to them have access to all elements (rows) in Puzzel.

If you assign a resource filter to a specific user, and then move this user to another user group, this user keeps the assigned filter also after the move.

The screenshot shows the 'Access Control' interface with the 'Assign Resource Filter' section expanded. The 'Company' is 'Puzzel Demo Product'. The 'User Group' dropdown is set to 'Sales'. The 'Sales filter' row has the 'Inherit' checkbox checked and the 'Value' set to 'Off'. Red arrows point to the 'Sales' dropdown and the 'Sales filter' row.

	Company Puzzel Demo Product	User Group Sales	User Select User
	Value	Inherit	Value
Dialler	On <input type="radio"/> Off <input checked="" type="radio"/>	<input checked="" type="checkbox"/>	On <input type="radio"/> Off <input checked="" type="radio"/>
Sales filter	On <input type="radio"/> Off <input checked="" type="radio"/>	<input type="checkbox"/>	On <input checked="" type="radio"/> Off <input type="radio"/>
Soundfile category and module	On <input type="radio"/> Off <input checked="" type="radio"/>	<input checked="" type="checkbox"/>	On <input type="radio"/> Off <input checked="" type="radio"/>
Statistics report category test	On <input type="radio"/> Off <input checked="" type="radio"/>	<input checked="" type="checkbox"/>	On <input type="radio"/> Off <input checked="" type="radio"/>
Support	On <input type="radio"/> Off <input checked="" type="radio"/>	<input checked="" type="checkbox"/>	On <input type="radio"/> Off <input checked="" type="radio"/>
Test Andreas	On <input type="radio"/> Off <input checked="" type="radio"/>	<input checked="" type="checkbox"/>	On <input type="radio"/> Off <input checked="" type="radio"/>
Test Paal	On <input type="radio"/> Off <input checked="" type="radio"/>	<input checked="" type="checkbox"/>	On <input type="radio"/> Off <input checked="" type="radio"/>

In the example above, the user group "Sales" has the resource filter "Sales filter" assigned.

Please note that you can not set value OFF for a user group (or a single user) if the value on the Company level (or user group level) is ON.

On page **Users - Users** (the user list) you can see a resource filter symbol (with the resource filter name(s) as tooltip) next to users that have one or more resource filters assigned, and if you enter a resource filter name in the Filter input field, only rows/agents with match will be shown.
