

Call handling

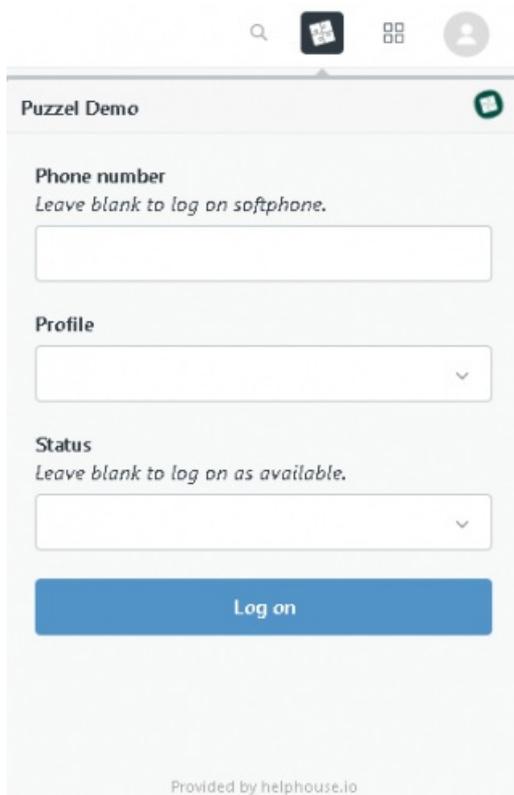

The call handling part of the application can be found in the top bar of Zendesk Support.

Logging on a profile

To log on to a profile, open the application in the top bar.

To log on using a mobile or landline phone, type in the phone number of the phone you want to use. If you want to log on using Puzzel's softphone, leave the field blank.

From the profile drop-down, select the profile you want to log on to. If you want log on in a pause status, select a status from the status drop-down menu. Leaving the field blank will log you on as available. Click logon.

The screenshot shows the top bar of the application with a search icon, a puzzle icon, a grid icon, and a profile icon. Below the top bar is a header with "Puzzel Demo" and a puzzle icon. The main form contains three sections: "Phone number" with a text input field and the instruction "Leave blank to log on softphone."; "Profile" with a dropdown menu; and "Status" with a dropdown menu and the instruction "Leave blank to log on as available.". At the bottom of the form is a blue "Log on" button. At the very bottom of the page, it says "Provided by helphouse.io".

Setting status

When logged on to a profile you can set your pause status from within the application. This is done from the drop-down at the top of the view. You can also set yourself as available again and log off the profile from this drop-down.
