

Diagramalternativer

Noen av rapportene har diagramalternativer. Her kan du velge:

- om det skal vises en tabell og/eller et diagram
- hvilken kolonne du vil skal vises i diagrammet
- hva slags diagram du vil ha (kake-, søyle- eller kurvediagram)
- om alle (standard) eller bare de første 5/10/15/20 radene skal vises

The screenshot shows a dialog box titled "Details pr queue" with a close button in the top right corner. The dialog is divided into several sections: "Column", "Row Filter - Queue", "Chart Options", and "Default Parameters". In the "Chart Options" section, there are two checkboxes: "Show Table" (checked) and "Show Chart" (unchecked). Below these, there are three dropdown menus: "Chart type:" set to "Pie", "Show Column:" set to "Incoming calls", and "Rows to show:" set to "All". There is also a "Show values" checkbox which is unchecked. At the bottom of the dialog, there are two buttons: "Apply" and "Save As...".

Hvis du bare vil at bestemte rader (som ikke er de øverste x radene) skal vises, kan du bruke Radfilter og manuelt velge radene som skal være med.
