

How to change opening hours?

When logged into the [Administration Portal](#), go to "Services" and then "Time".

The screenshot shows the Puzzel Administration Portal interface. At the top, the user is logged in as Magnus Hushovd. The navigation menu includes Home Page, Real-time, Users, Services (1), Statistics, and Cata. The Services menu is expanded, showing Time (2), Audio, Service Variables, KPI Alarm, Silent Monitoring, Queues, Dialler, and Services. The Time menu is further expanded to show Demoløsning (3). The main content area displays the 'List of Time Modules' page with a table of modules. The table has columns for Name and Webaccess. The 'Demoløsning' module is listed with a checkbox checked and the text '(7991_time_main)'. Below the table are buttons for 'Save changes' and 'Reset'.

Name	Webaccess
Demoløsning 3	<input checked="" type="checkbox"/> (7991_time_main)

Here are the time modules available for your organization located.

Note

Your organization might have a time module in service that you cannot see on this page. If you cant see a time module and you have ensured that another supervisor has not applied a Resource filter on you please contact Puzzel Support for assistance.

If the time module you want to edit is being modified by Puzzel, you will not be able to make changes to it, but you can view it. In the Edited by column, you can see the username of the technician that is making the changes. We recommend that you try again later, if you need to access the time module immediately please contact Puzzel Support.

Modifying a time module:

If you want to make changes to a time module, click on the modules name. A new page will appear with this time modules details. From this page you can add, edit or delete time periods.

▼ Common opening hours (Priority 3)

Days	From	To	Exit	Delete
Monday	08:00	16:59	Åpent ▾	🗑️
Tuesday	08:00	16:59	Åpent ▾	🗑️
Wednesday	08:00	16:59	Åpent ▾	🗑️
Thursday	09:00	16:59	Åpent ▾	🗑️
Friday	08:00	16:59	Åpent ▾	🗑️

+ Add a weekday

▶ Holidays and pre-defined days (Priority 2)

▶ Self-defined days (Priority 1) ?

The value in the To field should always be set one minute before the desired ending time. This is because it covers a whole minute, thus a period that is set to end at 15:59 will in reality end at 16:00:00. If the time would be set at 16:00 it would end at 16:01:00.

For the changes to take effect, you must click the Save Changes button. If you want to cancel the changes made and return to the settings as they were before the changes were made, click the Reset button.

Add Opening hours:

If you have access to the Time management tab but have not defined opening hours, the calls to your contact center will automatically be routed to Exit used if nothing else is specified (the Default exit), which is in most cases is Closed.

Define the contact center's **normal** opening hours in the **Common opening hours** tab by clicking "Add a weekday".

Add a weekday

Day	From time	To time	Exit
Monday	14:00	16:59	Stengt

+ Add a weekday

Holidays and pre-defined days (Priority 2)

Self-defined days (Priority 1) ?

In the new window that appears you can add an entry with From and To for Weekday (mon-fri), Weekend (sat-sun) or an individual day, using the relevant Exit. The easiest way is to define when its open and have Exit used if nothing else is specified = Closed. Add as many weekday rows as you need and click Save Changes.

In the example above, the solution is set to close earlier (14:00) and remains closed rest of the day. As the normal opening hours lasts until 17:00, it is unnecessary to define it longer than 16:59.

Add holidays and pre-defined days:

In the Holidays and pre-defined days tab you can define special opening hours for holidays and other special dates. You can add the relevant holidays for your Connect service one by one (Add a holiday or pre-defined day), or you can add your countrys holiday list and then remove days in the list you dont need before you save.

Add National holidays list:

Holidays and pre-defined days (Priority 2)

Days	From	To	Exit	Delete
<div style="display: flex; justify-content: space-between;"> + Add a holiday or pre-defined day ≡ Add national holidays </div>				

Self-defined days (Priority 1) ?

Select your country and click "Add". Delete the days you don't need, adjust the From and To if needed, and choose the correct Exit per day before you click Save changes.

Add national holidays ✕

Select holiday list

Norwegian holidays	Add
Norwegian holidays	
Swedish holidays	
Danish holidays	
English holidays	

Note

The national holiday lists in Puzzel Admin do not necessarily contain all official public holidays for the country!

Add a holiday:

Add a holiday or pre-defined day ✕

Holiday or pre-defined day	From time	To time	Exit	
New years day (1st January)	00:00	23:59	Brutal	Add
New years day (1st January)				
Epiphany day (6th January)				
Epiphany eve (5th January)				
Easter week (Mon-Mon)				
Easter (Thur-Mon)				
Day before Maundy Thursday				
Maundy Thursday				
Good Friday				

Note

If your contact center has limited opening hours during a holiday or pre-defined day, you need to take special measures. You will have to shorten the work day, just as the example above.

Add self-defined day:

In this section, you can define specific days and date ranges, who have different opening hours compared to the regular opening hours (and not listed in the holidays or pre-defined days).

▼ Self-defined days (Priority 1) ?

Days	From date	To date	From time	To time	Exit	Delete
+ Add day(s)						

Click Add day(s) to add one day or a range of days. You can:

- Add a time interval for one day, by setting the same From date and To date, and the desired From time and To time. To choose the whole day, select From time 00:00 and To time 23:59.
- Add a date range that should use the same exit for the whole date interval. Select From date and To date and set From time to 00:00 and To time to 23:59
- Add a date range that should use the same exit for a specific time interval for each of the days in the date interval. Select the desired date range (e.g. 01.07.2016 31.07.2016) and the desired time range (e.g. 16:00-17:59). Please note that the defined exit in this case will be used only 16:00-17:59 for each of the days in the date interval.
- Add a date range without a year if this range should be used all years from now. Enter the desired From date and To date on format dd-mm (e.g. From 01-07, To 31-07).

Click "Add" to post the new entry/entries to the list, and then click "Save changes". See example below:

▼ Self-defined days (Priority 1) ?

Days	From date	To date	From time	To time	Exit	Delete
Internal Event (18. May 2017)	18-05-2017	18-05-2017	12:00	16:59	Stengt ▾
