

Adding a Facebook Private Source

1. In the prompt above, choose “Add Facebook”
2. Choose the “Messenger” type of option, since we will be utilizing a private message channel:

Add Source Channel ?

Please select Facebook or Messenger

Facebook

Messenger

Select

3. Choosing either “Facebook” or “Messenger” will bring you to the next step, which is Authorizing against a specific Facebook Account, from which one can associate a page, from which to fetch either public or private messages. This looks like the image below:

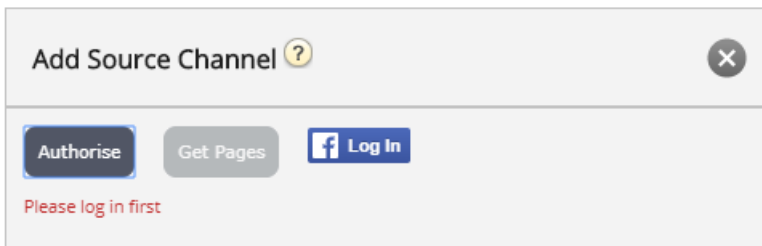

Add Source Channel ?

Authorise Get Pages

The next step is to click on the “Authorise” button, which will present one of two options:

1. If you are not logged in, you will be notified that you need to log in first, as demonstrated in the screenshot below:

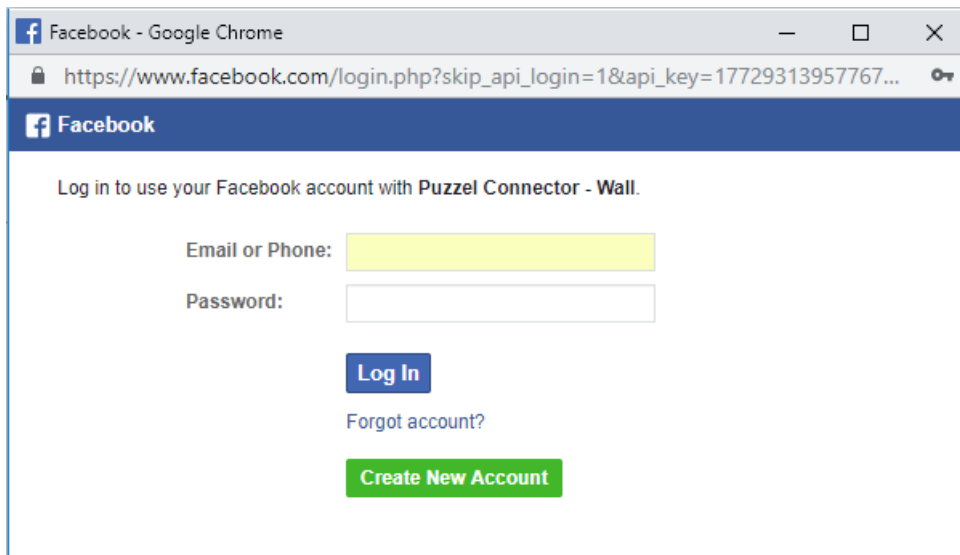

Add Source Channel ?

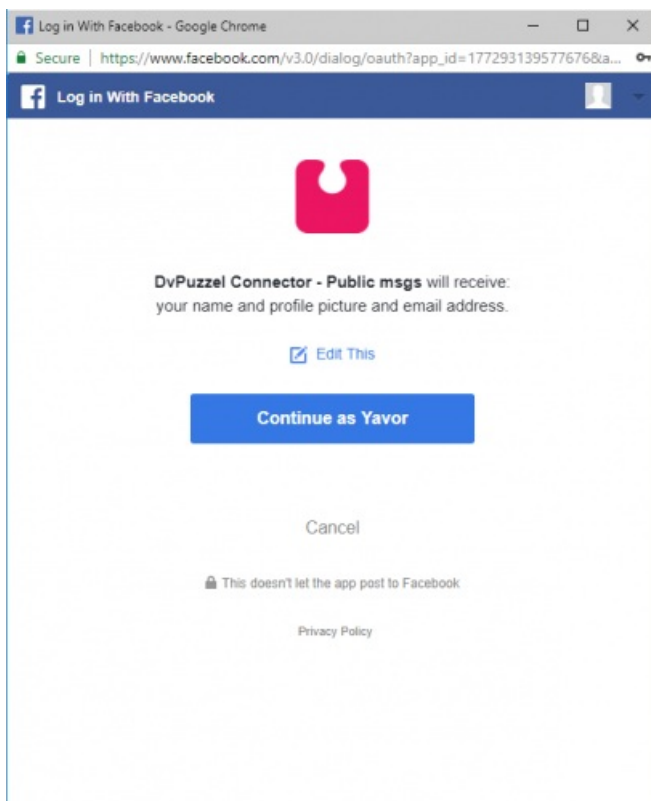

Authorise Get Pages Log In

Please log in first

Clicking, in turn on the “Log In” button, will require that you enter your credentials:

2. If you are logged into a specific account, you would simply be required to click on the “Get Pages” button. Once you have authenticated, in case the Puzzel Connector (the API that fetches the messages) has not been authorized, you will be presented with the following confirmation:

Once the above is cleared, you can click on the “Get Pages” button, as demonstrated below:

4. Once authenticated, the connector will get access to all the pages that belong to this account:

Add Source Channel ? ✕

Id	Name	
248399299113703	Puzzel Test Page 1	<button>Connect</button>

Choose the one that you want to connect to.

5. Configure the following form, by choosing a proper queue and entering a meaningful description:

Add Source Channel ? ✕

Select Service	<input type="text" value="81511569"/>	Select Queue	<input type="text" value="Facebook"/>
Message type	Private message	Description	<input type="text"/>
