

## Creating a new Role

To create a new Role,

1. Go to Account -> Roles -> click on  icon.
2. Enter the role details in the New role window and click Save

### New role

Display Name

Claim type

Level

---

3. This opens the Edit role window where you can add more details to the role.
4. Click on **Depends on** tab and add what role does this new role depend on. If there is no dependency, you can leave it blank and click Save

Edit role: Advanced user

Role **Depends on** User

Available		Selected
Account Administration	<input type="button" value="←"/>	Account Manager
Base User	<input type="button" value="→"/>	
Case Browser		
Configurator
