

## Sign in and password

As an administrator or supervisor user, go to <https://admin.puzzel.com> and enter your Customer number, Username and Password. If your Puzzel solution resides on the new UK platform, please use <https://uk.puzzel.com/admin>

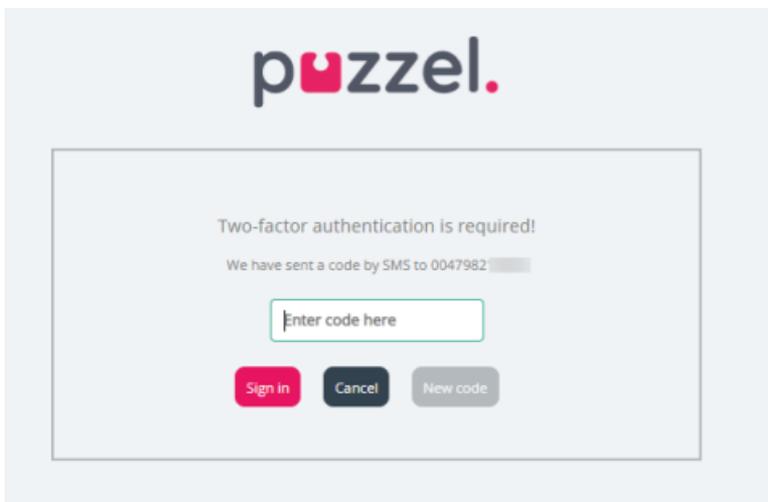

The image shows the Puzzel sign-in interface. At the top is the 'puzzel.' logo. Below it is a form with three input fields: 'CUSTOMER', 'USERNAME', and 'PASSWORD'. Each field has a small greyed-out area to its left, likely representing a placeholder or a previous value. Below the fields is a dark blue 'Sign in' button. Underneath the button is a link: 'Forgot password / Need new password'. At the bottom of the form area, there is a footer: '©2010-2022 Puzzel AS | [Support](#) | [Privacy Policy](#) | [Puzzel.com](#)'.

If an incorrect password is entered 4 times in a row, the user account will be blocked. The user can re-open the account by ordering a one-time password (by email/SMS) and define a new password.

If **two-factor authentication** is configured for a user, the user will receive a code by SMS or email after having entered the correct password. Two-factor authentication is only supported in [admin.puzzel.com](https://admin.puzzel.com), [agent.puzzel.com](https://agent.puzzel.com) and in the Puzzel app.

For more on how to configure two-factor authentication, please [click here](#).

The image shows the two-factor authentication screen. At the top is the 'puzzel.' logo. Below it is a message: 'Two-factor authentication is required!'. Underneath is a line of text: 'We have sent a code by SMS to 0047982' followed by a greyed-out area. Below this is an input field with the placeholder text 'Enter code here'. At the bottom are three buttons: 'Sign in' (red), 'Cancel' (dark blue), and 'New code' (grey).

In case you forget your password, or it has expired, you can create a new password by clicking the *Forgot password/Need new password* link. Once you clicked the link, you will be transferred to a new page where you will be asked to enter your email address or mobile phone number to order a new (one-time) password.

If the entered email address or mobile number is registered on a Puzzel user account, Puzzel will send a one-time password by email/SMS and transfer you to a new page where you can use the one-time password to create a new permanent password.

A one-time password is valid for 10 minutes only. If incorrect, one-time password is entered 4 times, it is no longer valid.

If you do not receive the one-time password by SMS within a short time, you can order a new one-time password. If you entered your email address and you don't find the email with the one-time password in your inbox, please take a look in your spam/junk folder.

A new password must be at least 6 characters and contain at least one letter and one digit (unless *Strong password* is configured).

The different properties related to Sign to Puzzel can be found on page [Users - Products under Sign in to Puzzel](#)

#### Single-Sign-On to Puzzel agent application using Azure

If your company's users have Microsoft Azure accounts, the users can sign in to Puzzel's agent application without entering Puzzel customer number, username and password.

Before users can use such Single-Sign-On to Puzzel's agent application;

1. Azure must be added as an "external authentication provider" on page *Users – Products under Sign in to Puzzel*
2. You need to upload a file with the agents' Puzzel user\_id and the corresponding Azure id, which (usually) is the user's email address.

A Puzzel user with a defined Azure id (external\_id in Puzzel) can use <https://agent.puzzel.com?connection=azure> to sign in to Puzzel's agent application without entering Puzzel username and password.

If you do not allow such SSO agents to sign in to agent.puzzel.com with Puzzel username and password, please turn ON property *'Reject user to sign in with Puzzel username'*.

#### Note

Please note that we do not support Single-Sign-On to <https://admin.puzzel.com>
