

Holidays and Pre-defined Days

In the Holidays and pre-defined days accordion, you can define special opening hours for holidays and other special dates. You can add the relevant holidays for your Puzzel solution one by one (Add a holiday or pre-defined day), or you can add your country's holiday list and then remove days in the list you don't need before you save.

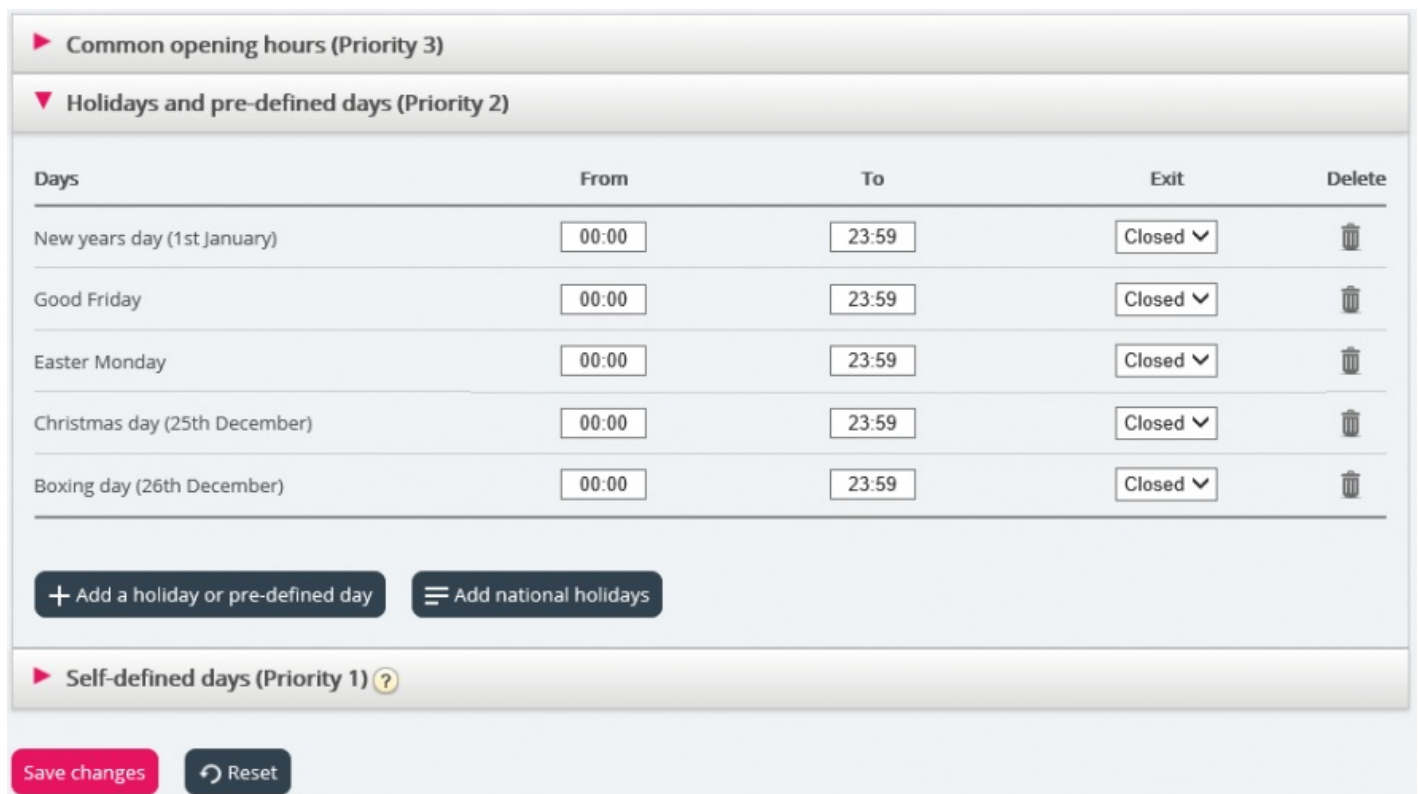

Adding a national holiday list

First click *Add national holidays*:

The screenshot shows the 'Holidays and pre-defined days (Priority 2)' section. Below the 'Days' and 'From' headers, there are two buttons: '+ Add a holiday or pre-defined day' and '≡ Add national holidays'. A red arrow points from the 'Add national holidays' button to a modal dialog box titled 'Add national holidays'. The dialog has a close button (X) in the top right. Inside the dialog, there is a 'Select holiday list' section with a dropdown menu showing 'English holidays' and an 'Add' button.

Then select the correct country's list and click *Add* so that all days are added:

The screenshot shows the 'Holidays and pre-defined days (Priority 2)' section with a table of added holidays. The table has the following columns: Days, From, To, Exit, and Delete. The table contains five rows of holiday data:

Days	From	To	Exit	Delete
New years day (1st January)	00:00	23:59	Closed ▾	🗑️
Good Friday	00:00	23:59	Closed ▾	🗑️
Easter Monday	00:00	23:59	Closed ▾	🗑️
Christmas day (25th December)	00:00	23:59	Closed ▾	🗑️
Boxing day (26th December)	00:00	23:59	Closed ▾	🗑️

Below the table, there are two buttons: '+ Add a holiday or pre-defined day' and '≡ Add national holidays'. At the bottom of the section, there are 'Save changes' and 'Reset' buttons.

Delete the days you don't need, adjust the *From* and *To* if needed, and choose the correct *Exit* per day before you click *Save changes*.

Please note that the national holiday lists in Puzzel do not necessarily contain all official public holidays for the country, and it may contain days/dates that are not public holidays!

There are more holidays and pre-defined days defined in Puzzel than the ones included in your country's "national holidays" list. Some holidays in Puzzel are floating (e.g. Good Friday and Easter Monday) and some are fixed dates (e.g. New Year's Day = 1st January). If you can't find a specific holiday in Puzzel (e.g. Early May bank holiday), you can add this holiday's date as a Self-defined day.

Add a holiday

Click the *Add a holiday* button, and then select the relevant day in the list box, adjust the *From* and *To* if needed, and make sure the *Exit* is correct and click *Add*.

Then click *Save changes* if things look OK.

Please note if your contact centre has limited opening hours during a holiday or pre-defined day, you need to take special measures. Please see details in chapter [The Precedence System](#).
