

## Sound File Category

Categories are used to organise the sound files in your service. Here you can add new categories, change name for existing categories and delete unwanted categories as long as they are not in use. We recommend that you select the correct Category for each sound file under accordion Sound File Library.

▶ Sound Files in Use

▶ Sound File Library

▼ Sound File Category

Category	Actions
<input type="text" value="Info"/>	
<input type="text" value="Menu"/>	
<input type="text" value="Queue"/>
