

Preview list, Search, and Disable contact from list

Click *Preview List* to see the list content. Only the first 100 contacts will be displayed initially. Please note that filters may have been defined limiting what you see, but you can uncheck Use defined filter(s) if you want to see/search in the whole list and not only the filtered content.

Search Use defined filter(s) Show internal id

Called number	external_id	Firstname	Lastname	Gender	Age	Category	Place	Product	var8	Campaignid	Contactid	DateCreated	Disable
+47	1001	first1	last 1	m	44	a	Oslo	produkt x	-	-	-	2020-11-13 01:31:21	<input type="checkbox"/>
004	1002	first2	last 2	f	78	b	Oslo	produkt z	-	-	-	2020-11-13 01:31:21	<input type="checkbox"/>
982	1003	first3	last 3	m	33	a	Bergen	produkt y	-	-	-	2020-11-13 01:31:21	<input type="checkbox"/>
982	1004	first4	last 4	m	24	x	Bergen	produkt y	-	-	-	2020-11-13 01:31:21	<input type="checkbox"/>
982	1005	first5	last 5	m	26	x	Bode	produkt y	-	-	-	2020-11-13 01:31:21	<input type="checkbox"/>

You can search for contacts by entering text or a phone number, and you can use * as a wildcard. Example searches:

- *hans** shows all records beginning with hans
- **123* shows all records ending with 123
- *12345678* shows all records equal to 12345678

If you want to exclude a contact from the active list, so that the Dialler does not call the contact's number (again), just check the **Disable** box in the right column for this contact.

If you tick 'Show phone_2' and 'Show internal id', these columns will be shown next to phone_num. Internal id is Puzzel's internal id of the record.

Please not that if an agent that was offered a Preview Dialler call clicked [Cancel](#), the contact will be set to Disabled.
