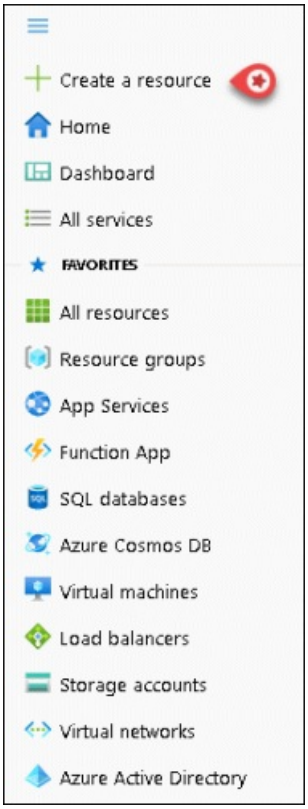
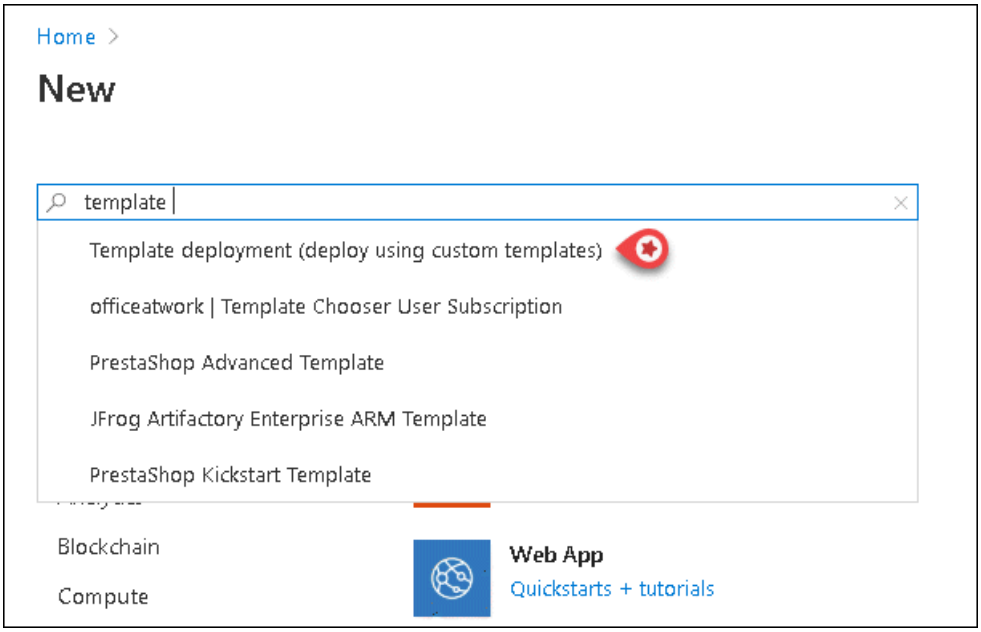
Creating Logic App for Office 365

This section describes the process of creating a resource template in Azure that defines the resources you will need to deploy for your solution. To create a template:

1. Click on the Hamburger sign on the top left corner and select**Create a resource** or select **Create a resource** icon in the **Home page**.



2. Create a new resource template of typeTemplate deployment (deploy using custom templates)



3. Click on **Create**
