

## Configuring record viewer in Salesforce

The record viewer allows you to view chat transcripts and listen to call recordings archived in the Puzzel application. It is a passive tool which simply permits you to access the archive after having authenticated into the Puzzel Application. By making the records available within Salesforce, the agents can go through the previous interactions with the customer and provide a greater customer service.

### Adding the component to EnquiryLog page

To add the record viewer component to the EnquiryLog page, you need to:

1. Open any EnquiryLog page and navigate to the **Setup** option in the toolbar at the top right corner of your screen and select **Edit Page** option. This will open the Page designer screen

2. In the **Components** option, under the **Custom-Managed** section in the left panel, look for the **PuzzelRecordViewer**

3. Drag the component and place it in the centre panel where you would like the record viewer to be displayed

4. Save and Activate the page

If you now open any enquiry log page, you will be able to see the PuzzelRecordViewer component. Enter the Puzzel credentials to gain access to the archive.

The screenshot displays the 'EnquiryLog-00069' interface. At the top, there are navigation tabs for 'Agent', 'Sonic', 'Queue', 'Chat', 'CallDurationFriendly', 'QueueTimeFriendly', and 'Session'. Below this is a 'Record Viewer' section containing a 'puzzel.' login form with fields for 'customer', 'username', and 'password', and a 'Login' button. To the right is an 'Activity' panel with options for 'New Event', 'New Task', 'Log a Call', and 'Email'. Below the activity panel is a section for 'Upcoming & Overview' showing a chat event on 2022-02-11 05:35. At the bottom left, there are 'Phone' and 'History' icons.

Example Call Recording for the Enquiry Log

The screenshot displays the 'EnquiryLog-00058' interface. The top header includes a headset icon and the text 'EnquiryLog EnquiryLog-00058'. Below this is a 'Record Viewer' section featuring a video player for 'Part 1(queue\_support)'. The video player shows a progress bar at 0:00 / 2:21 and includes play, volume, and menu icons. Below the video player is a 'Logout' link.
