

Chat Window Positioning

You can choose where on the screen to open the chat interface when initiated, by defining the horizontal and vertical position on the screen (left-middle-right | top-middle-bottom). This means that there are nine positions to choose between:

1	p ≌ zzel.	2 Home Products Contact us	3
4	Start live chat Your name Your email address What's your query about? Start chat	Call us on 815 11 569, or let us call you back Your name Your phone number	6
7	E-mail us at: demo.product@demointele.com Tweet to grtc_Demo_Prod Find us on Facebook Facebook Messenger	Powered by Puzzel.	9

The default position is number 9 on the picture above, bottom right hand side (horizontal position= right | vertical position= bottom).

You can also define if the chatter is allowed to drag and resize the chat window by the use of the "draggable", and "resizeable" parameters in the chat form.
