

Creating a new Role

To create a new Role,

- 1. Go to Account -> Roles -> click on
- 2. Enter the role details in the New role window and click Save

New role
Display Name Advanced user
Claim type http://schemas.vergic.com/api/identity/claims/role#Advanceduser
Level 10
Save Cancel

icon.

- 3. This opens the Edit role window where you can add more details to the role.
- 4. Click on **Depends on** tab and add what role does this new role depend on. If there is no dependency, you can leave it blank and click Save

Edit role: Advanced user				
Role Depends on User				
Available	Q		Selected	Q
Account Administration	<u> </u>	«	Account Manager	
Base User		»		
Case Browser				
Configurator				
Meeting Organizer
