

## Starting a Beta Trial

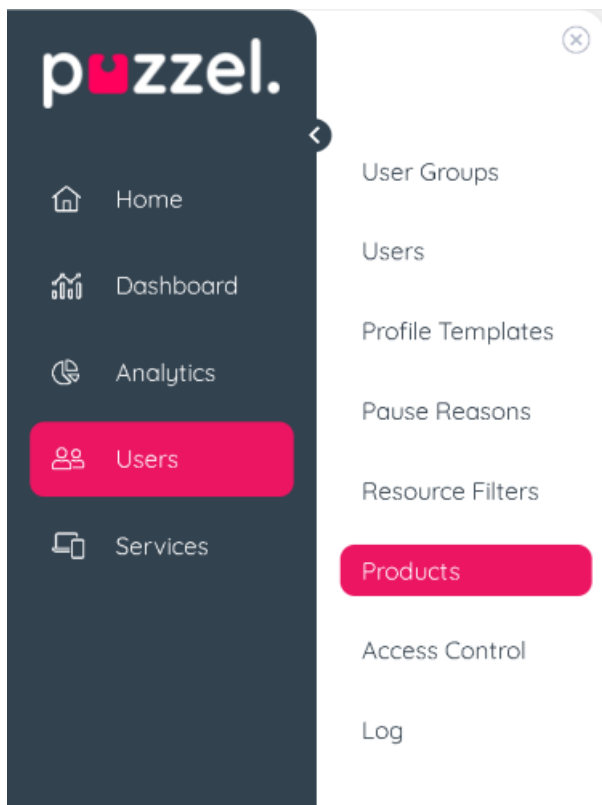

### Note

Please note that Performance Management involves processing of statistical data in Puzzel's authorised sub-processor Microsoft and its cloud infrastructure. Hence you need to make sure that you have read the [information](#) regarding a potential need for an amended Data Processor Agreement (DPA) with Puzzel.

In order to start using Puzzel Performance Management, you will first need to enable the Analytics Menu in the Puzzel Admin Portal.

### Enabling Analytics menu

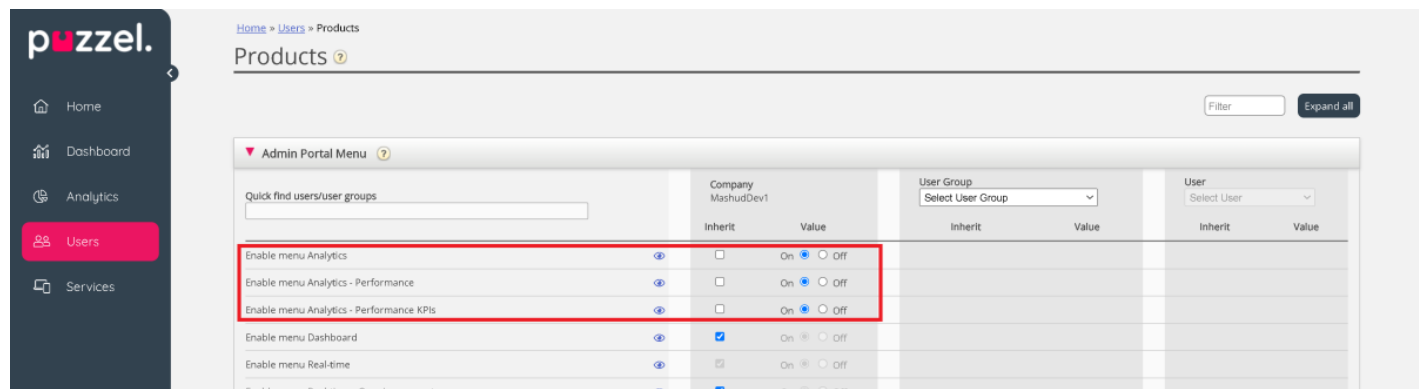

As an admin user with the appropriate privileges in the Puzzel Admin Portal, navigate to the Users Menu and click on the Products Sub Menu as shown below:

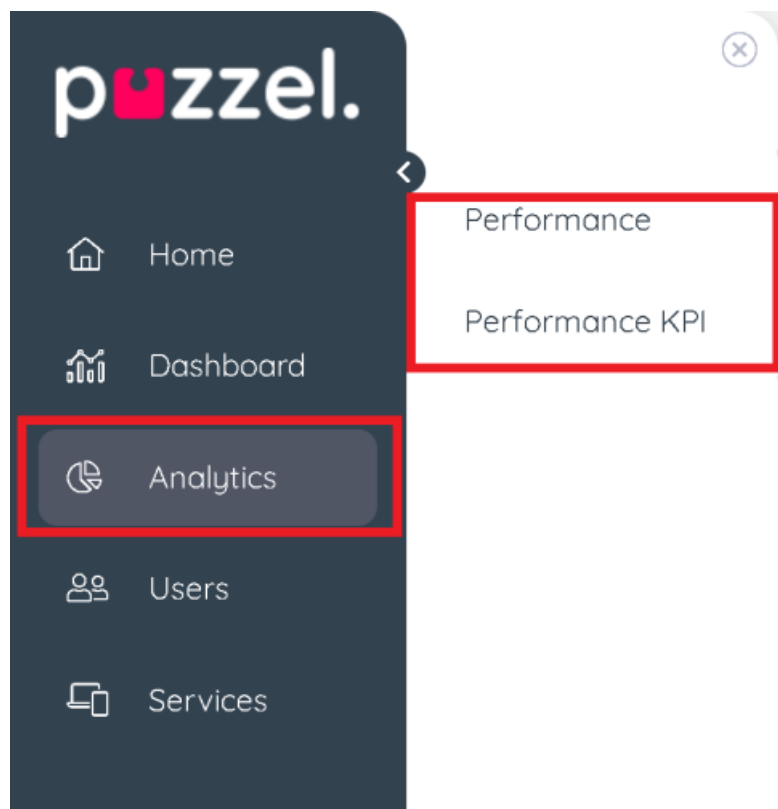

Access to the Analytics Menu can be enabled for your company level, user group level or for specific users from the accordion labelled '**Admin Portal Menu**' as shown below.

The following properties may need to be enabled depending on which user groups or users you wish to grant access to either have visibility, manage performance or both.

- Enable menu Analytics: this makes the Analytics Menu visible
- Enable menu Analytics - Performance: allows viewing of the performance results
- Enable menu Analytics - Performance KPIs: allows access to create and manage KPI configurations and assignment of goals

You will now have access to the Analytics main menu and the respective sub menu as shown below:

## Starting the Free Trial

### Note

We have enabled 'Start 45 days Free Trial' button and can now be used.

To start the beta trial, navigate to Performance KPI or the Performance sub menu item. You will be presented with a landing page and a button to start the 45 days free trial. Clicking on the 'Start 45 days Free Trial' button automatically subscribes your organisation for 45 days and begins loading statistics data for the past 30 days.

This initial process can take 15 - 30 mins depending on the amount of data to be processed. All subsequent data loading and processing happens automatically every 15 minutes.
