

Reports in Dashboards

With the December 2022 Release, we are bringing another historical data set into the Dashboards - the Reports. Essentially, this is another widget type, which can be added as a visualisation to a dashboard. The data diagram, in terms of Dashboard Sources looks like this:

Aside from a few configuration specificities, the Historical Reports Widget is similar to any other widget that one can configure on a Dashboard and further manipulate its size, location and visual properties.
