

Customising and creating translations for Queue reservation banner

For all banners created, you will get a sneak peek into it, in the **Preview** section on the right while on the Edit banner window.

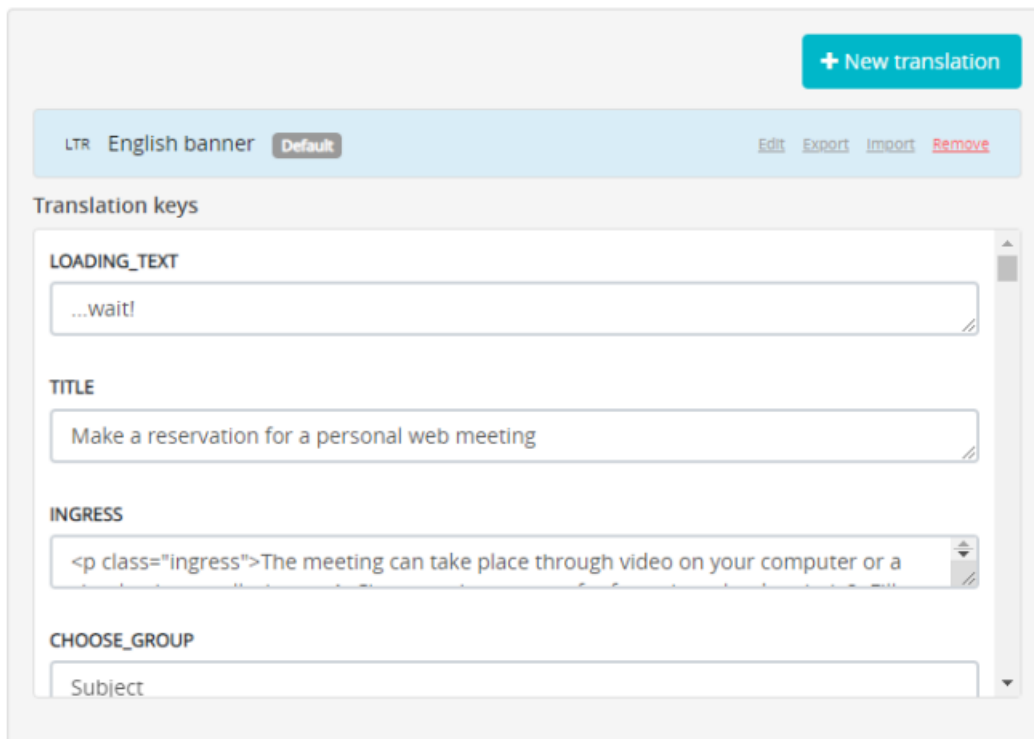

The screenshot shows a preview window for a reservation banner. At the top, there are tabs for 'Preview' and 'Guide'. The main content area has a heading 'Make a reservation for a personal web meeting' and a sub-heading 'The meeting can take place through video on your computer or a simple phone call.' Below this, there are two numbered instructions: '1. Choose a time you prefer from the calendar.' and '2. Fill out your contact information and click "Make reservation"'. The main part of the interface is a calendar for January 2020, showing days from Monday to Friday. A 'Today' button is present, and a 'Subject' dropdown menu is visible. The calendar shows availability for various times, with a 'First available time' callout pointing to 10:00 on Wednesday. Below the calendar, there are several control elements: 'Preview mode' with buttons for 'Mobile', 'Tablet', 'Medium', and 'Desktop', a checked 'Scale' checkbox, and a 'Preview address' button. Under 'Booked meetings banner views', there are buttons for 'Calendar 1', 'Calendar 2', and a checked 'Show form' checkbox. At the bottom, there are several orange buttons: 'Reserved', 'Enter', 'Enter early 1', 'Enter early 2', 'Enter late', 'Enter error', 'Cancel', and 'Cancelled'.

Further down, there are a number of orange buttons, which when clicked will show what the customer will see at his end. For example : When clicked on **Enter**, it displays what the visitor sees right before the meeting starts. Click **Enter early 1**, it displays the message, when the visitor is too early and so on. When pressing cancel and cancelled you will also see the templates for when a meeting has been cancelled.

If you wish to change any text in the template, you can do it in the Translations Tab. The changes can be seen immediately in the preview section. Click **Save** if you are happy with the changes.
